Mountbatten Braille Whisperer

For children and their teachers, from very early childhood to university, Mountbatten offers connectivity, resources and software to support flexible teaching and educational needs.

The audio response reinforces learning and facilitates autonomous learning. Mountbatten's ergonomic light-touch keyboard is suitable even for very young children. Interaction with mainstream devices like iOS or Android brings children with visual impairments even closer to their peers and families. A quiet whisper of the Braille Whisperer facilitates full inclusion. The Whisperer is also the fastest electronic Braille. A long-lasting battery allows for even more flexibility in a general education classroom or anywhere you want your children to interact with Braille.

Connect the QWERTY keyboard, interface with your PC or Mac computers via USB, connect wirelessly with your iOS or Android device to enjoy all benefits of a quiet yet potent Mountbatten Whisperer. MB-Comm and MBMimic apps come handy when you are in need for embossing a document, homework, or a letter. Additional communication features like the Whiteboard or Chat enrich your communication activities.

Features

Speech; Battery operation; Multiple languages; Two-way print and Braille conversion; USB or wireless communication with mainstream devices; Embossing; Braille graphics capabilities.
